

Climate shelters

Cool islands for urban environments

Our Climate Refuges create liveable and sustainable environments that contribute to reducing the heat effect. Through a smart combination of sustainable elements, we generate more shade, lower high temperatures, and promote social interaction.

Modular and adaptable, they offer countless combinations for any space or need, making them the ultimate solution for reducing urban space temperatures.

The implementation of these solutions promotes the health and well-being of citizens by creating living spaces with more favourable conditions.

Benefits

- ✔ Reduces the environmental temperature by up to 10 degrees.
- ✔ Improves environmental conditions by creating humid spaces.
- ✔ Enhances air quality and reduces environmental and acoustic pollution.
- ✔ Increases biodiversity.
- ✔ Adapts to any type of space or need.
- ✔ Promotes social interaction
