

Urban Sense

Healthy and efficient environments

Advanced environmental control system. Monitors and provides air quality data in open or closed environments. Using sophisticated sensors, it ensures comfort and a healthy environment.

Additionally, with control algorithms, it automatically adjusts parameters for an optimal environment in all aspects. It also measures airborne particles, noise levels, and other factors affecting the quality of the environment.

Benefits

- ✔ Increase efficiency and productivity.
- ✔ Improve the comfort and well-being of people.
- ✔ Optimize energy consumption.
- ✔ Achieve significant cost savings.

Sensors

- ✔ Air quality sensor
- ✔ Temperature sensor
- ✔ Humidity sensor
